

Patrol flashlight with dual switches
and dual docking station
PATROL CHARGER +, 700 lm

Product price:

\$146.64

Product codes:

Reference: THH0052

Product features:

Product line: Tactical Line
Run time: 2 h 30 min
Light output [lm]: 700
Light source: Cree XP-L LED
Power: 3.7V 3350 mAh
Beam distance [m]: 250
Weight [g]: 230
Dimensions [mm]: 185 × 47 × 31
Designation: Tactical
Type of power supply: Accumulator
Light output: Dedicated battery
Type of lighting: Hand flashlights

Product description:

Crafted from aircraft-grade aluminum with a hardcoat anodized finish and securely sealed for an IPX6 waterproof rating, the Patrol is your perfect partner while protecting the perimeter in extreme conditions. Attach an optional signal cone and transform the Patrol into an emergency signal wand to safely evacuate vehicles, people and even assist in aircraft landing. The pre-focused beam provides just enough diffusion without sacrificing spotlight, to illuminate both the target and surroundings. The Patrol's hard-wearing rubber coating gives a sure grip in all conditions. Equipped with both a standard and a tactical switch, its quick and easy to cycle through the Patrol's four operational modes. The charging station possesses extra LEDs that light up during a power failure, enabling fast retrieval in an emergency. Now new Patrol Charger + with extra battery charging station is available. You are able to charge second battery (sold separately) and in the same time. This solution will make it possible to use Patrol twice as long.
